

# **Changzhou Vocational Institute of Engineering (CZIE)**

## **Admission brochure for International Students (2021)**

### **I. Introduction to CZIE**

Founded in 1958, Changzhou Vocational Institute of Engineering has been both in the list of High-level Majors-group Construction Colleges with Chinese characteristics and National High-quality Vocational College.

Taking Inspire the spirits and put learning into practice as the motto, and adhering to the running orientation of Serving Jiangsu and radiating the Yangtze River Delta on the basis of Changzhou, the college has 7 secondary schools for "green and intelligent" technology, focusing on building five majors groups of Applied Chemical Technology, Intelligent Welding, Intelligent Construction, Inspection and Testing certification, and Modern Business Service, so as to provide green chemical industry, high-end equipment manufacturing and inspection and detection certification, modern construction and other industries to cultivate high-quality technical and skilled personnel. The college adheres to the open-running strategy steadily and promotes the internationalization.

The college has establishes Sino-German Vocational Education and Technological Innovation Service Center, the Belt& Road Research Institute, and the International Cultural Exchange center and etc.. The college has been selected by the international cultural exchange center of the Ministry of Education into the first list of "construction center for the humanities and communication talents training base in 2020 in the field of Intelligent Manufacturing". International cooperation education platforms such as Mandalay branch in Myanmar, Sino-German Institute of Design and Digital Media, Cambodia-Changzhou Vocational Institute of Engineering-Yalong Silk Road College, and Sino-German International Welding Technology Training & Examination Center were established.

Our college learns from international professional qualification certificates and standards, including ISO9606 International Welder Assessment Standards, Australian TAFE Construction Engineering Technology Courses and Laboratory Construction Standards, and German Professional Laboratory Construction Standards for Applied Chemical Technology, and invites more than 20 international experts to instruct professional development and enhance professional internationalization;

The college actively responds to the “Belt and Road” Initiative and has enrolled more than 200 foreign students along the “Belt and Road” regions. We have continuously strengthened cooperation with foreign governments, institutions, and “going global” enterprises to jointly train international students. We cooperated with the Ministry of Education of Myanmar to enroll 30 students from the “China-Myanmar Vocational Education International Students Cooperation Project”, and cooperated with “going global” enterprises to establish a commissioning class, enrolling 46 Myanmar international students majoring in Mechatronics. We also cooperated with international brand hotels to provide internship courses for Southeast Asian students majoring in Hotel Management. Changzhou Vocational Institute of Engineering will focus on training technical and skilled talents for countries along the “Belt and Road” regions and also training localized talents for “going global” enterprises.

## **II. Programs**

***Key programs:*** Applied Chemical Technology, Pharmaceutical production Technology, Industrial Analysis Technology, Fine Chemical Technology, Welding Technology and Automation, Electric Automation Technology, Electromechanical Integration Technology, Physical and Chemical Testing and Quality Checking Technology, Applied Technology of IOT, Architectural Engineering Technology, Building Cost of Projects, Intelligent Building Engineering Technology, Underground and Tunnel Engineering Technology, Photovoltaic Material Preparation Technology, Architectural Material Engineering Technology, Polymer materials Engineering Technology, Auto Inspection and maintenance Technology, International Business

### **III. Application requirements**

All applicants must meet the following basic requirements .

1. Be non-Chinese citizens;
2. High school graduation or above;
3. A certain degree of English or Chinese foundation;
